**Weekly progress report – April 8 (8ᵗʰ report)**

After adding wine recommendation system, there's nothing left to do, so I just added social media to keep in touch with clients

```go
import (
    "fmt"
    "net/http"
    "html/template"
)

func main() {
    http.HandleFunc("/", func(w http.ResponseWriter, r *http.Request) {
        // Load the HTML template file
        tmpl, err := template.ParseFiles("index.html")
        if err != nil {
            http.Error(w, err.Error(), http.StatusInternalServerError)
            return
        }

        // Render the template with the KakaoTalk button
        data := struct {
            KakaoTalkUrl string
        }{
            KakaoTalkUrl: "https://pf.kakao.com/_xxx/chat",
        }
        err = tmpl.Execute(w, data)
        if err != nil {
            http.Error(w, err.Error(), http.StatusInternalServerError)
            return
        }
    })

    fmt.Println("Server listening on port 8080")
    http.ListenAndServe(":8080", nil)
}
```

RUDA SNS
Wine recommendation , Wine purchase inquiry
TALK

Also after splitting two large datasets from kaggle, now i'm getting more clear matches

	country	designation	points	price	province	region_1	region_2	title	variety	winery	year
